THE DEMOGRAPHY OF WAR: GERMANY

In the three-quarters of a century between 1870 and 1945 Germany engaged in three major wars. The first, limited in scope and intensity, achieved its objective of political expansion without undue disturbance of the processes of population replacement and redistribution. The Prussian War Department reported 41 thousand dead among the Germans who crossed the frontiers of France, but only 16 thousand of these died in action. /1 Civilian deaths in Germany increased somewhat in 1871 and 1872, and there was a slight birth deficit in 1871, which left a nick in the smooth regularity of the German age structure that was still discernible in 1939. This was not a population vulnerable to catastrophe, however, for as late as 1876-1880 the birth rate was 39, the death rate 26, and the rate of natural increase 13. /2

The general symmetry of the age distribution of the German population in the early twentieth century indicates the demographic well-being of a people characterized by adequate fertility, normal mortality, and limited emigration. (See Figure 1.) The annual number of births reached a maximum of 2.0 million in 1901-1905. A portion of the substantial natural increase of the late nineteenth century was drained off in international migration, /3 but the home population increased from 41 million in 1871 to 65 million in 1910. The number of men in the military ages 20-34 rose from over 4 million in 1871 to 7 million in 1910. By that year the relative numerical equality in military manpower that had existed between France and Germany before the Franco-Prussian War had been replaced by a German numerical superiority of over three million men.

World War I

In August of 1914 the confident armies of a virile Germany entered the conflict that was to be ended by Christmas, but actually did not end until four years and three months later. The German, Austro-Hungarian, and Russian Empires had disappeared in the war that cost Europe (including Asiatic Russia) some fifty million lives. /4 Germany's total population deficit of 5.4 million amounted to 8 per cent of her 1914 population of 67.8 million. There were over 2 million military dead and 737 thousand excess civilian deaths over age one. There was a birth deficit of 3.2 million, for the birth rate, 27.5 in 1913, dropped to 15.2 in 1916 and 13.9 in 1917. /5

During the 'twenties and 'thirties the scars of the German demographic structure were gradually healing. The male cohorts decimated by World War I were advancing in age; by 1940 the age group that had been 20-24 in 1914 was in the upper forties. By 1970 there would have been hardly a scar in the age pyramid to indicate that two million German men had died in a war over half a century before. In that year, however, there would have been a deep gash among adults aged 50-54, the survivors of the lessened birth cohorts of the years 1915-1918. There would have been a secondary deficit among youths in their twenties, for those who were not born during World War I could not contribute to future generations.

The Interwar Years

Two decades of peace gave Germany a chance at demographic recovery, but during that period, like other Western powers, she was confronted by a demographic hazard deeper than war, the precipitant decline of fertility. The birth rate increased to 25.9 in 1920 and 25.3 in 1921, then decreased, to reach lows of 15.1 in 1932 and 14.7 in 1933. Estimates of the imminent decline of the total population flourished. In 1926 the Statistisches Reichsamt published its first official series. According to these estimates, maintenance of the mortality of 1921-1923 and the fertility of 1924-1925 would have produced continued population increases through 1975, but a twenty-five per cent decline in fertility between 1924-1925 and 1954-1955 would have yielded decline in total population soon after 1945. /6 New estimates had to be issued by 1930 to take account of the continued decline in fertility below the level assumed in the mid-'twenties. The most publicized projection, which assumed mortality as in the life table of 1924-1926, age-specific marriage rates for women rising to the 1910 level by 1940, and fertility falling twenty-five per cent between 1927 and 1955, indicated a declining population by 1960. /7

Germany, once increasing in power potential vis-à-vis her Western neighbors because of her comparatively later industrial and demographic development, now saw herself losing ground relatively to the more agrarian and still expanding Slavic peoples of the East. Demographic armament appeared imperative to Adolf Hitler and his adjutants of the Third Reich. Barrages of propaganda, positive inducements to marriage and childbearing, and the legal prohibition of abortion reinforced economic expansion and a rise in employment as factors conducive to the increase of fertility. New predictions of the Statistisches Reichsamt, published in 1938, pushed the higher fertility of 1936 into the future, assuming decreases in infant mortality and increases in marriages. Austria was included as a part of Greater Germany. On the basis of these assumptions, the total population, 74.9 million in 1938, would approach a maximum of 80.5 million in 1970. This final prediction by the Statistisches Reichsamt clearly exemplified the military orientation of policy and projections, for this was an elaborate computation of the population development that would occur if the supply of births in Germany, Austria, and the Sudetenland were sufficient to maintain the military cohort aged 19 at 755 thousand. /8

The censuses of 1925, 1933, and 1939 mirrored the major political and demographic events of German history. The population of Germany within its 1933 area ("Altreich" without the Saar) increased from 57.8 million in 1910 to 62.4 million in 1925, and to 65.4 million in 1933. /9 Children under 15, however, numbered 19.6 million in 1910, 16.1 million in 1925, and 15.8 million in 1933. Children under six had declined 30 per cent in less than a quarter of a century, children 6-14 by 12 per cent. This erosion of the base of the age pyramid was the cumulative result of the decline in fertility. (See Figure 1.) Above this eroded base there was a great gash, the children who were not born during World War I. Youths aged 15-18 were only three-fifths as numerous in 1933 as they had been twenty-five years before. Women at the various ages above 30 were some forty per cent more numerous in 1933 than in 1910; in general, the rate of increase became greater with advancing age. For men, the progression of the age groups

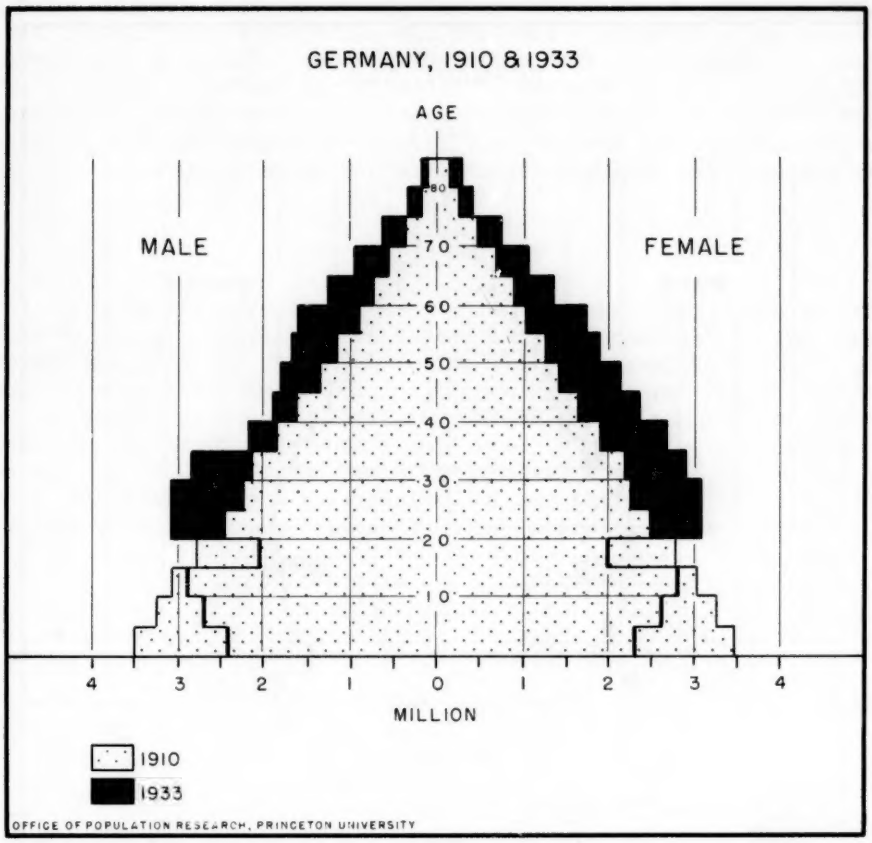

Figure 1

was broken sharply at ages 30-50, for these were the survivors of the men who contributed most heavily to the armies of 1914-1918. Only at ages 50 and above did the age and sex patterns approach the regularity that the entire age structure had had in 1910.

By 1939 figures for "Germany without the Saar" were no longer published. Instead, for purposes of historical comparison there were figures for the "Altreich" (Germany as of 1937), whose 1939 population numbered 69.3 million. Germany's population in her then present boundaries, Greater Germany, was ten million larger, for it included Austria, the Sudeten area, and Memel. Within the 1937 boundaries there had been significant changes in the age structure since 1933, especially the broadening of the base of the age pyramid. The youngest cohort, 0-4, was larger than that aged 5-9 by one million, in fact, larger than any other cohort up to the youths 25-29. The largest age group, however, was that of young adults 30-34.

War and declining fertility were indeed producing in Germany a "Volk ohne Jugend." Compared to the broad base of children in 1910, even the enlarged Hitlerian birth cohort of 1935-1939 appeared inadequate to meet the responsibilities of a militaristic state. As Dudley Kirk's theoretical computations for 1940 so clearly indicate, Germany's approaching decline in military manpower was due primarily to long

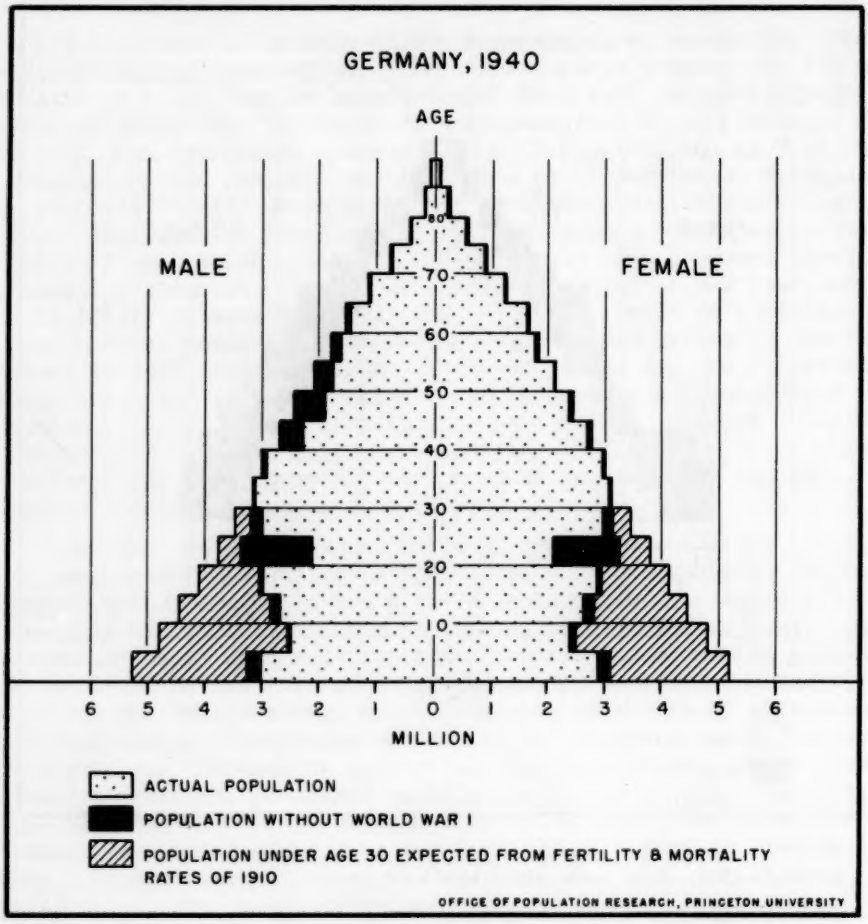

Figure 2

continued declines in fertility. (See Figure 2.) The numerically less important losses of war appeared as irregularities in the age and sex structure of a population that had little recuperative potential. Children aged 0-4 in 1940 would have been 494 thousand more numerous if the birth deficits of World War I had not occurred. They would have been 4.6 million more numerous if fertility and mortality had remained at the 1910 levels. The comparison for the total population is also striking. The orderly continuation of the fertility and mortality of the period of the 1910 census would have produced a total population of 88.7 million in 1940. The dynamics of the period from 1910 to 1940 without war would have produced a population of 75.7 million. The estimated actual population was 69.5 million. Declining rates of natural increase between 1910 and 1940 cost Germany 13.0 million people; World War I had cost 6.2 million people by 1940. (Both computations ignore migration.)

The imminent depopulation so feared by prewar Germany was basically a product of the changing balance of births and deaths. It was accentuated by World War I, not created by it. Both declining fertil-

ity and war act as decelerators of population growth, but the former is a normal process of social and economic adjustment, the latter a cataclysmic interlude whose effects are felt throughout the social and economic structure for decades. A serious demographic situation existed in prewar Germany, not because fertility declined, but because a precipitant decline in fertility that carried the net reproduction rate far below unity coincided with the aftermath of a devastating war.

World War II

By 1939 the effects of economic recovery and population policies were becoming evident in the enlargement of the base of the deeply eroded age pyramid. The trend toward biological extinction was beginning to seem less inevitable, although optimism was still limited. But as summer advanced, the military preparations mounted and the demands for security and "Lebensraum" rose to new heights. Finally the German armies crossed the frontier of Poland and World War II had begun. This was to be a "Blitzkrieg," a war that would avoid the biological costs commonly associated with international struggles. During the first years of Germany's easy victories, this goal seemed possible of attainment. The decline in natural increase was slight, for the resources of a conquered continent fed the people of Germany. Full employment, abundant military furloughs, and the élan of victory maintained German fertility at little below its 1939 level. /10

Total war on a global scale came in 1941. German armies invaded Russia with initial success, and a confident Japan attacked the United States at Pearl Harbor and drove on for the rice regions of Southeast Asia. German military casualties mounted, while the birth rate of the home population declined. The murder of Europe's Jewish population and the ruthless transfer of people and impressment of labor contributed substantially to the human costs of the war and added to the hatred of Germany and Germans that was to complicate postwar rehabilitation and reconstruction. By early 1943 some 2.5 million civilian Germans had gone out to the occupied countries, while some 6.5 million workers and prisoners of war were utilized as laborers within Germany. /11 As more and more of the 2.7 million tons of bombs that were utilized in the strategic bombing of Germany found their targets, millions of evacuated or fleeing Germans were added to the migratory streams of the continent. With German defeat millions of people from the East pushed westward to escape the Soviet armies, while Germans throughout the occupied areas attempted to return to their homeland.

The balance sheet of war cannot yet be drawn. German military dead are estimated to number some 3.25 million. /12 Over 300 thousand civilians were killed by air bombardment. /13 Yet losses from increased civilian mortality and lowered fertility were probably substantially less than in World War I. The decimated cohorts of adults and the weakened generations of children were not the only costs of World War II, however. Throughout the war years Germans had violated the basic right of free men to choose between movement and stability. In spreading the doctrine of ethnic purity they had emphasized the strategic dangers of ethnic diversity. In historic retribution, the agreement of Potsdam stated that "...the transfer to Germany of German populations, or elements thereof, remaining in Poland, Czechoslovakia and Hungary will have to be undertaken...." The resources of Germany were

cut, the major losses being the restoration of the Saar and Alsace-Lorraine to France and the de facto occupation of the territory east of the Oder-Neisse by Poland. Within this constricted area a Germany which had shouted for "Lebensraum" and ethnic purity was now forced to absorb most of the Germans of the continent.

Migrations

The Allied Control Council was charged with the execution of the Potsdam decision in the four zones. It was estimated that 6.65 million persons would be involved: 3.5 million from Poland, 2.5 million from Czechoslovakia, 500 thousand from Hungary, and 150 thousand from Austria. Kulischer's recent estimates place the number of people who have been transferred as 2.4 million for Czechoslovakia, 2 million for Poland, and 178 thousand for Hungary. In addition, many Germans fled or were expelled before the organized transfers began. According to his estimates there were probably 300 thousand from Czechoslovakia, one million from Old Poland, 4 million from New Poland, 500 thousand from northern East Prussia, annexed by the U.S.S.R., and several hundred thousand from the Balkans. By July 1, 1947, more than 9.5 million German refugees were reported in rump Germany. /14

A brief summary of the published statistics of the American Zone may serve to indicate the changes in demographic composition and social structure that are implicit in these population movements. Between the end of the war and the beginning of 1948, more than 3 million displaced persons had left the Zone, over 2 million Sudeten Germans and Swabians had entered it. There had also been sizable movements within Germany, as people returned to their homes or left their homes to seek employment or food elsewhere. In 1946, one resident in each five in the American Zone reported residence outside the Zone in 1939. Four per cent had lived in Germany west of the Oder-Neisse, 4 per cent in Germany east of the Oder-Neisse, 8 per cent in Czechoslovakia, nearly 4 per cent elsewhere.

Vital Statistics

These mass migrations and the political and economic disorganization of Germany would have made the restoration of vital-statistics registration systems difficult had it not been for the German tradition of reporting and of conforming to governmental requirements. Furthermore, governmental administration had been maintained at the local and the provincial levels. It was not so much the collection of the statistics as their interpretation that presented the difficult problem. The mobility of the population was so great that a numerator of reported vital events for even a relatively brief time span did not correspond to the denominator of an estimated population at a specific time. Moreover, crude rates were inadequate indicators of the reproductive potential in these populations of distorted age structure, surplus women, separated families, and postponed marriages.

Crude vital rates for the Western zones and Berlin have recovered substantially but there is as yet little evidence of that decided increase in fertility that has occurred in many nations. The crude birth rates had reached 16 to 18 per 1,000 total population by the second quarter of 1946. Fragmentary data indicate that they have remained near this level through the first quarter of 1948. Marriage rates

appeared to be increasing in late 1947. If this increase was general and was maintained, some increase in births may have occurred. General death rates and infant mortality declined in the early postwar period. By late 1946 and 1947, rates of natural increase of 2 to 7 per 1,000 total population replaced the earlier rates of decrease.

Further indication of the behavior of vital rates is possible from an analysis of the local area data contained in the zonal and German official publications. In most areas the birth deficits of this war did not approach those of World War I, primarily because the decline of fertility had already reduced "normal" fertility to the point where such deep cuts as occurred in World War I were not possible. Urban-rural and regional differentials in levels of fertility and mortality, acute during the late war years, persisted into the years of occupation. The control of mortality maintained by the Germans during the war and the Military Governments during the years of collapse and slow revival is noteworthy. These generalizations may be made somewhat more specific by citations to the vital rates of the city of Berlin, the United States Zone as a whole, and the province of Bavaria.

In Berlin the crude birth rate reached 17.2 in 1941, then declined to 14.7 in 1943, 8.6 in 1944, and 7.6 in 1946. By 1947 it had recovered only to 10 or 11. Crude death rates, 11 to 14 in the prewar period, reached 16.2 in 1944, 24.6 in 1946. Infant mortality stood at 123 per 1,000 live births in 1944, 100 to 125 in 1946. The rate of natural decrease, 7.6 per 1,000 total population in 1944, reached 17.0 in 1946. In the American Zone there was an excess of births over deaths of only 375 thousand in the seven and a half years between the census of 1939 and that of 1946, an annual average of 3.4 per 1,000 per year. There was probably a natural decrease in the Zone as a whole in 1944 and 1945. In Bavaria the birth rate, over 21 in 1939-1941, declined to a low of 14.8 in 1945, when there was a surplus of civilian deaths over births. In 1946, with 7.1 per cent of the population evacuees and 18.1 per cent refugees or expellees, the live birth rate was 18.2, the death rate 13.4, the crude rate of natural increase 4.8. Comparable rates for 1936 had been respectively 20.2, 12.6, and 7.6.

Since no vital statistics are published for the Soviet Zone, it is impossible to estimate the level of births and deaths for Germany as a whole.

Census Enumeration

Materials for the analysis of trends in the number, distribution, and characteristics of the German people are voluminous but on the whole unsatisfactory. Ration registrations and the reports of the employment service furnish continuing inventories, but they are limited in scope and subject to specific and not always systematic biases. An enumeration reported as a "Volkszählung" was taken in the Soviet Zone and Berlin as of December 1, 1945, and a census was taken in the French Zone as of January 26, 1946.

A census of the total population of the American, British, French, and Soviet Zones and Berlin was taken on October 29, 1946. Prisoners of war, displaced persons in centers, and interned civilians were counted by the Occupation authorities, all others by the local German authorities. Fourteen questions were prescribed for the four zones and

Berlin. Zone commanders could add other questions. They also decided upon the form of the card and the method of entry. The fourteen prescribed questions were as follows: 1. - 2. Name; 3. Relationship to head of household; 4. Sex; 5. Day, month, year, and place of birth; 6. Marital status; 7. Citizenship (How secured, when, and country of origin); 8. National origin; 9. Mother tongue; 10. Religious membership; 11. Educational status; 12. Occupation (A. Present occupation or other sources of income, B. Occupational status, C. Place of work); 13. Present residence and legal residence on September 1, 1939; 14. Service in the German armed forces. There has been no central processing, analysis, or publication of the results of this census. The statistical offices of Military Government in the various zones release data on numbers and distribution for all zones and more detailed data for their respective zones. No information at present available permits assessment of the comparability of presumably identical tabulations.

Many of the fundamental questions as to the present status and potential growth of the German population could not be answered on the basis of the census of October 29, 1946, even in the unlikely event that complete tabulations were published for the four zones and Berlin. The census covered persons within the frontiers of Germany as of the census date, but there were many prisoners of war and missing members of the Wehrmacht whose eventual return might contribute substantially toward balancing the age and sex structure of truncated Germany. In a special registration in the American Zone in early 1947, families reported 822 thousand missing members, of whom only 398 thousand were known to be prisoners of war. /15 Estimates based on the extension of these United States Zone estimates to all Germany indicated 3.2 million absent persons, of whom 1,536 thousand were prisoners of war, 1,652 thousand missing members of the Wehrmacht. To this 3.2 million must be added some 150 to 200 thousand for the area east of the Oder-Neisse. Estimates of the Moscow Conference and later pronouncements indicated 1.8 to 1.9 million prisoners of war in foreign areas. These and other estimates are for differing dates, and none of them can be accepted as definitive for its date of issue.

Furthermore, it should be noted that the censuses of the Soviet Zone in December, 1945, of the French Zone in January, 1946, and of all Germany in October, 1946, are snapshots of an unsettled population recovering from a devastating war whose losses are subject to approximate conjecture, and moving toward a future whose broad outlines are not yet determined. The facts of the present and the problems of the future are suggested rather than measured by the statistics of 1946.

The Germany of October, 1946

The Germany included in the census of 1946 was even more densely settled than that "overcrowded land" for which Hitler demanded "Lebensraum" in the 'thirties. The 69.3 million Germans resident in 1939 within the area as of 1937 had available to them 470 thousand sq. km. of land; and 60 million Germans resident in 1939 within the area as of 1946 had 357 thousand sq. km. The lost areas constituted 24 per cent of the prewar area, but they had included only 13 per cent of the prewar population. /16 Per capita agricultural acreage was about one-third less than it had been in 1939. /17 Germany had been only eighty per cent self-sufficient in food before the war. Official American

* Germany. U.S. Zone. Statistical Annex, Issue No. XIII. Report of the Military Governor, No. 33. March, 1948. Pp. 8-9.

1/ Exclusive of Bremen.

2/ The former enclave of Bremen had a population of 749 thousand, of whom 346 thousand were males.

3/ The total populations for the sectors were as follows (in '000): British Sector, 603; French Sector, 422; U.S.S.R. Sector, 1,170; U.S. Sector, 984. In addition there were 1,143 persons in ship crews.

estimates indicate that the future economy could provide about sixty per cent of the prewar diet if the efficiency of production that existed prior to the war could be restored. /18

The total population within the constricted area numbered 65.9 million, 5 per cent below the total population of the "Altreich" in 1939, but 10 per cent above the 1939 population of the 1946 area. The margin of error in the 1946 figure is difficult to determine. The possibility of incompleteness and inaccuracy in enumeration is high, for conditions were disorganized in many areas. There is also the strong likelihood that illegal migrants from one Occupation zone to another were not reached by census enumerators. More definitive assessment of the completeness and accuracy of the 1946 census will be possible if and when more than simple counts by sex are available for the country as a whole.

The changed distribution of population within Germany is the result of local economic pressures combined with an interplay of political and psychological factors. The movements of the population were generally westward within the country. The percentage increase from 1939 to 1946 was 12.7 for the British Zone, 13.7 for the Soviet Zone, 20.5 for the United States Zone. (See Table 1.) The population of the French Zone decreased 4.3 per cent, that of Berlin 26.7 per cent. Within each zone the movement was from the urban and more densely settled areas to the rural and less densely settled regions. During the war years voluntary migrations and evacuations had dispersed people; during the early postwar years the search for subsistence prevented many Germans from returning to the cities and sent others countryward. The millions of refugees and evacuees were allocated throughout the various areas on the assumption that they could subsist and be absorbed more easily in the less densely settled districts. The effect of these movements on the pattern of population distribution is shown for the American Zone in Table 2. The picture was substantially similar in the British Zone. /19

Sex and Age Structure

An increased density of population within a predominantly industrial country whose technical plants, transportation, and urban buildings have been heavily destroyed by war presents serious problems of subsistence and reconstruction at whatever level of agricultural-industrial production. In Germany these problems have been complicated by the dislocations in sex and age structure that have resulted from the superimposition of the losses of one war on those of a previous war almost exactly a generation earlier.

In 1946 Germany as a whole had 125 women for each hundred men. If the 3.2 million missing members of the Wehrmacht should return, the surplus of women would be reduced to 12.5 per cent. If, as is more probable, only half should return, there would be 118 women for each hundred men. In absolute terms, there were 7.3 million surplus women among the 65.9 million Germans enumerated in October, 1946. The return of all the missing members of the Wehrmacht would leave a surplus of 4.1 million women; the return of half, a surplus of 5.7 million.

The surplus of women varied greatly in the different areas and age groups. (See front cover chart.) It amounted to 18.7 per cent in the British Zone, 20.6 per cent in the United States Zone, 25.6

Table 2

Population Changes in Stadt- und Landkreise
United States Zone, 1939-1946*

Area	Population (In thousands)		Per Cent Change
	1939	1946	
Total	14,258	17,174	20.5
Stadtkreise	5,516	4,972	- 9.9

per cent in the French Zone, 33.7 per cent in the Russian Zone, and 46.4 per cent in Berlin. In no area was it distributed equally throughout the life span of the population. The pattern of change is most apparent in the age distribution by single years of age that has been published for the British Zone. /20 Boys exceeded girls at all ages from birth through age 18. The surplus of women began at age 19, where there were 117 women for each hundred men, then jumped to 156 at age 20, 171 at age 21. There were more than 180 women for each hundred men aged 22 and 23 in 1946. The relative surplus of women became less with advancing age, the number of women per hundred men declining to 150 at age 36, and 111 at age 46. The age cohorts of 1900-1905 were peculiarly fortunate, for their male members were generally too young for service in World War I and relatively old for active service in World War II. Surpluses of women rose again among the survivors of the births of the 1890's, for these cohorts had borne the major military losses of World War I.

This disturbance in the relative numbers of men and women would in itself complicate the smooth functioning of Germany's social and economic system. There is another difficulty, however, in the abnormal relationship of the successive age groups. These demographic barriers to effective social and economic functioning are most apparent in the distortions of the age pyramid for Berlin as of December, 1945. (See Figure 3.) Refugees and evacuees were returning. Transferred peoples, released members of the Wehrmacht, and new streams of refugees added to the difficulties of subsistence, housing, and reconstruction at the same time that they presumably contributed something to the creation of a more balanced labor force.

The costs of successive wars, deflation, and mass migration in a more "normal" situation than that of quadripartite Berlin are evident in the age structure of Württemberg-Baden as determined in the censuses of 1939 and 1946, even though the "sample" of one million returns utilized for the analysis was apparently selected on the basis of date of return and thus was overweighted by the population of the rural areas. /21 If there had been no movement into Württemberg-Baden after 1939 to compensate for the war losses, the male population would have declined one-fourth, the female population one-tenth, below the number expected on the basis of a projection of the prewar situation. There would have been large deficits of males in the ages 0-4 and 19-25. The already decimated birth cohorts of World War I lost half or more of their surviving members in World War II. The migrant population contributed substantially to the increase of the total population, but its age and sex structure was broadly similar to that of the native group. The net result was a total population weighted with children and the aged, and severely limited in the number of males in the productive ages.

It is hazardous to use local or regional populations as a basis for assessing the impact of the war on the population potential of all Germany. The 1946 data available for the French and Soviet Zones and the city of Berlin are not sufficient to make valid estimates of the changing size and structure of the total German population. Hence description that extends beyond city and provincial areas will be limited to the American Zone. It is recognized that the United States Zone itself is neither economically, politically, nor demographically exactly comparable to the other zones. None the less, the broad structure, dynamics, and problems of the postwar German population are similar in all regions. Differences are in magnitude rather than in basic characteristics.

The Population of the American Zone /22

The net effect of the changes between 1939 and 1946 in the American Zone was an increase of 16 per cent in the male population, 33 per cent in the female population. Youths, older workers, and the aged increased in numbers among both men and women. In the age group 14 to 39, however, the number of men decreased approximately 11 per cent, whereas the number of women increased about 28 per cent. /23 The increases that occurred were due primarily to the inclusion of migrant groups. In the absence of war or migration since 1939 the American Zone would have had a native population of 14.5 million; its actual native population was 1.6 million less. Without migration even the

return of all missing members of the Wehrmacht could not have erased a decline of this magnitude.

Migration supplemented the decimated native population of the United States Zone, but it contributed only slightly to the normalization of the age and sex structure. (See Table 3.) Among the German migrants from east of the Oder-Neisse the proportion of children was higher, and the deficits of men less extreme. Migrants from Czechoslovakia and from the British, French, and Berlin areas were similar to natives of the American Zone. Migrants from the Russian Zone included appreciable numbers of men apparently fleeing labor impressment. They alone of all the groups included a surplus of males in the critical ages of 15-19. Their surplus of females at ages 20-29 was small, their surplus of males considerable at ages 30-49. Surpluses of males also appeared among the migrants aged 20-29 from Southeastern Europe. However, these groups with larger proportions of males from the Soviet area of Germany and the Soviet occupied areas of the Southeast were so insignificant numerically that they did little to balance the age and sex structure of the American Zone as a whole.

The Future

Projections were made for the population of the American Zone on the following assumptions: specific mortality remains as in 1932-1934 and specific fertility by marital status as in 1928-1932; the number of potential mothers is limited by the number of married men three years older, and the proportion of men married in each age group remains as in the period before 1933; and, finally, the 570 thousand prisoners of war missing at the time of the census will return by the end of 1949. Under these assumptions the total population, 16.2 million in 1946, /24 will increase to 16.9 million in 1956 and decline slowly to 16.7 million in 1971. The female population will reach its maximum in 1951, but the male population will continue to increase throughout the period as returning migrants and the oncoming normal generations of youth replace the depleted ranks of adults. Surpluses of women in the labor force ages will lessen and eventually disappear.

The normal aging that has characterized the populations of the West will continue in the German population of the American Zone. In the twenty-five years between 1946 and 1971 the total female population will decline 3 per cent, but this will be the net result of a decline of 17 per cent of those under age 15, a decline of 7 per cent at ages 15-64, and an increase of 63 per cent at ages 65 and above.

The recovery of military potential, viewed solely from the demographic standpoint, will be substantial. Males aged 15-34 numbered 1.8 million in 1946. By 1956-1961 they will number over 2.5 million, as the larger birth cohorts of the late 'thirties become adults. By this time, the survivors of the doubly stricken birth cohorts of 1915-1918 will reach middle age and become less important in Germany's military potential. Even in 1971 males aged 15-34 will be 26 per cent more numerous than they were in 1946. The same phenomenon of increasing military manpower appears if the influence of the losses of World War II is eliminated by considering only the age group 15-19, for the boys in this group in 1946 were relatively untouched by the military mortality of the last war. Their number, 606 thousand in 1946, will become 777 thousand in 1956, an increase of 28 per cent that is due

entirely to the fluctuations of the birth rate during the Hitlerian and the war years. What happens to military potential after 1956 depends on the future of the German birth rate.

Doubtless the future population of the American Zone will deviate widely from that projected on the basis of the returns of the 1946 census. Not all the absent prisoners of war will return, and other migrants have and will come in from other regions of Germany and from German groups not yet transferred. If opportunities are available, many Germans will leave Germany. Marriage, birth, and death rates are assumed to reach and remain at the levels characteristic of the middle of the interwar period. If there is no reasonably adequate solution to the "German problem" they may do so, but this is unlikely if there is reconstruction with economic functioning at a level of reasonably full employment. Furthermore, projections for the American Zone cannot be expanded as the basis of projections for all Germany. None the less, certain conclusions emerge from analysis of the fragmentary materials for the various zones, the more detailed materials for the British and American Zones, and the various attempts to estimate the future population, of which the official American projection is the most comprehensive.

Conclusion

World War II did not result in the biological extermination of the German people. The number of the German dead was small in proportion to the total lives lost in Europe and Russia because of German aggression. German military and civilian dead were probably less numerous than the civilians whom the Germans transported to their death in extermination camps. The biological consequences of the war were serious for Germany because the ratio of fatalities to military manpower was high, the effects of this war were superimposed on those of a war a generation earlier that had been even more severe in its demographic impact, and fertility had declined to the point where the resilience of the population was low. It must be emphasized, however, that a united Germany would retain the largest cohesive block of military manpower west of the U.S.S.R. for some time.

The preceding resume is based on current statistical materials available in the Library of Congress and in the Office of the Coordinator, International Statistics, Bureau of the Census. The cooperation of the staff of the Census Library Project in the location of sources is gratefully acknowledged.

22/ Unless otherwise specified, the remaining materials are taken from the statistical publications of the Office of Military Government of the United States Zone. Detailed citations are included in the bibliography of this and earlier issues of Population Index.

23/ Data for 1939 are given in: Germany. U. S. Zone. Military

Government for Germany. The population of the US Zone of Germany. Part 2. Some results of the census of October 1946 in relation to economic, social and demographic policy. Office of Military Government for Germany, November, 1947. P. 12. Data for 1946 are based on tables in: Germany. U. S. Zone. Statistical Annex, Issue No. XIII. Report of the Military Governor, No. 33. March, 1948. P. 8.

24/ Germany. U. S. Zone. Military Government for Germany. The population of the US Zone of Germany. Part 2. Some results of the census of October 1946 in relation to economic, social and demographic policy. Office of Military Government for Germany, November, 1947. Pp. 27, 88-89. It will be noted that the total population figure of 16.2 million used as the basis for the projections differs from the more complete total of 17.2 million given in Table 1. The 16.2 million excludes Bremen, which was added to the United States Zone after the census, and displaced persons in camp.

BIBLIOGRAPHY

This bibliography is compiled principally from publications available to the editors or cited in the literature. Selection is on the basis of intrinsic merit, current interest, and paucity or richness of the literature for the various areas and problems. Coverage is less complete in peripheral fields, selection less rigid in underdeveloped areas. The major resources utilized in addition to those of the Office of Population Research are the current acquisitions of the Princeton University Library and the Library of Congress.

The editors acknowledge the generous cooperation of the staff of the Library of Congress, and especially that of the Census Library Project, in making the numerous excellent facilities of the Library available to them. The coverage of the official publications of national governments is assisted materially by the continuing cooperation of the Inter American Statistical Institute and the Office of the Coordinator of International Statistics, Bureau of the Census.

Abstracts contributed by individuals other than the editors are acknowledged by placing the name of the contributor in brackets at the end of the entry. If a translation, abstract, or review is taken from a secondary published source, that source is also cited in brackets. The titles of books and articles not available to the editors and not covered by available reviews or abstracts are marked with the symbol °. The following abbreviations are used for common bibliographic sources:

B.A. - Biological Abstracts.
B.A.D.P.E.S. - Bulletin Analytique de Documentation Politique, Economique et Sociale Contemporaine.
C.D.A.B. - Child Development Abstracts and Bibliography.
C.G.P. - Current Geographical Publications.
C.J.E.P.S. - Canadian Journal of Economics and Political Science.
I.L.R. - International Labour Review.
M.E.J. - Middle East Journal.
M.L.R. - Monthly Labor Review.
Q.C.I.M. - Quarterly Cumulative Index Medicus.
R.I.S. - Revista Internacional de Sociología.
U.N.M.L.S.A. - United Nations. Monthly List of Selected Articles.
U.S.B.C. - U.S. Bureau of the Census. Publications on Foreign Countries.
U.S.D.A. - U.S. Department of Agriculture. Bibliography of Agriculture.
U.S.Q.B.L. - U.S. Quarterly Book List.

The further development of the bibliography as a contribution to international demographic research requires the cooperation of scholars throughout the world. The editors welcome exchange relationships with institutions, reprints of research contributions, and citations to fugitive studies or those in non-Western languages.

1726. Australia. Queensland Bureau of Industry.
The density of world farm population. Economic News 16(10-11):1-8. Oct.-Dec., 1947.

The basic table in this study of the relationship between population density and productivity shows for various countries of the world the area classified under nine types of climate, the total equivalent area of standard farm land, actual number of males engaged in rural industry in 1937, actual density of males engaged in rural industry per square mile of standard farm land equivalent, net

production per male engaged in rural industry per year, and male rural workers as percentage of total population. Varying rates of population growth to 1987 are taken into account, and an estimate is made of the percentage of the working population that must be devoted to primary production on three assumed levels of world average diets. The final section presents a hypothetical distribution of the rural and total population of the world in 1987 and indicates the extent of migration needed to increase the average annual food consumption.

1731. Bromberger, E.
The growth of population in Palestine. Population Studies 2(1):71-91. June, 1948.
"In this paper the author examines the accuracy of the vital statistics of Palestine. He presents evidence which leads him to believe that the rate of natural increase of the Moslem population, as calculated by the Department of Statistics of the Government of Palestine, is too high. He maintains that there has been under-registration of deaths, and over-registration of births....Moreover, the official birth-rate takes no account of the large number of Moslem women, who ...have entered the country illegally. An attempt is made to assess the numerical significance of these factors and to support the assertions by considering a number of demographic indices. The author makes a new estimate of the total Moslem population, and also estimates the total Jewish population, taking into account such statistics of illegal immigration as are in the possession of the Jewish Agency."

The aging of population and the prolongation of active life. (Vieillissement de la population et prolongation de la vie active.) By Jean Daric. Also an appendix: The results of a sample survey. (En annexe: Les résultats d'une enquête par sondage.) By Alain Girard. Travaux et Documents, Cahier No. 7. Paris, Presses Universitaires de France, 1948. 208 pp.

Part I, "Le vieillissement de la popu-

lation: Les conséquences économiques et sociales," deals with the increasing proportion of older age groups in France; compares the aging of the French population with trends in other countries; and discusses the economic, financial, social, political, and military consequences of the aging population.

Part II, "La prolongation de la vie active: Les données de fait," considers public opinion concerning prolongation of active life, arguments in favor of such prolongation, and age trends of the active population.

Part III deals with "La prolongation de la vie active: Les possibilités d'application."

The logistic growth of political areas. Social Forces 26(4):396-408. May, 1948.

An analysis of the logistic growth of governmental areas as exemplified by various empires of the Western world and of Asia, and by Russia and the United States. Particular attention is given to the expansion of the British Empire, which is correlated with various cultural surges, including the growth curve of the population of England and Wales.

1747. Hersch, Liebmann.
Potential demography and population aging. (Démographie potentielle et vieillissement de la population.) Population 3(2):233-248. April-June, 1948.

"Starting from the life expectancy of individuals, potential demography clarifies different aspects of demographic phenomena that are incompletely perceived by traditional demography. In this article [the author] presents the essential ideas and the fundamental formulas of potential demography. In addition, he makes...applications of these formulas and ideas and, in particular, treats the ageing of the population and the...consequences which stem from it." [English summary]

1750. International Labour Organisation. Preparatory Asiatic Regional Conference.
The economic background of social policy including problems of industrialisation. Fourth item on the agenda. New Delhi, International Labour Office, 1947. iv, 221 pp.

This report was prepared for the 1947 meeting of the Preparatory Asiatic Regional Conference. "The first Part of the Report seeks to describe the main characteristics of the economies of Asiatic countries. In four chapters it surveys successively the levels of income and productivity in these countries before the Second World War, and the characteristic features of their agriculture, their traditional industries, and their modern industry. Chapter V reviews the economic effects of the war.

"The second Part of the Report attempts an analysis of the main problems involved in raising the present low levels of productivity and income. Chapter VI discusses the relation between poverty and the problem of population [income and

size of population, industrial development and capital formation, income and population growth]; Chapter VII, the various methods by which incomes might be raised; and Chapter VIII, some international aspects of economic development. Chapter IX summarises briefly the conclusions suggested by the preceding survey and analysis."

1751. International Union for the Scientific Study of Population.

Constitution adopted by the General Assembly of the Union in Washington, D.C., September 6-11, 1947. Milbank Memorial Fund Quarterly 25(3):317-322. July, 1948.

English translation of the Constitution as adopted at the 1947 meeting.

1752. Issawi, Charles P.

Egypt: an economic and social analysis. Issued under the auspices of the Royal Institute of International Affairs. London, Oxford University Press, 1947. xvi, 219 pp.

This attempt at a comprehensive study of "the leader of the chain of Arab countries, the fountain of orthodoxy...[for] Moslems," covers political and economic background and history, population and wealth, the various segments of the economy, finance, social and political structure, and education. Ch. 4, "Population and wealth," summarizes current official statistics and recent studies.

1753. Jaffe, A. J.

Technological innovations and the changing socioeconomic structure. Scientific Monthly 67(2):93-102. Aug., 1948.

"The thesis of this article is that one of the important elements in precipitating social change is technological innovation. Technological innovations, taken together, have produced the vast increases in productivity, or output per man-hour (or per worker as the case may be). Such radical changes in the efficiency of production and the utilization of man power, in turn, have affected the social structure." The analysis deals with the effect of these changes upon the industrial and occupational composition of the population in the United States, the plane of living, and the class composition of the population as shown by class differences in marriage, birth, and death rates and in attitudes toward social and political questions.

1754. Laugier, Henri.

The first step in the international approach to the problems of undeveloped areas. Milbank Memorial Fund Quarterly 26(3):256-259. July, 1948.

The author urges a world inventory of natural resources, beginning with underdeveloped regions and including "a survey of the botanical, zoological, and mineralogical resources and characteristics of soils in the various territories."

See also Title 1756, this issue.

1755. Loftus, P. J.

Features of the demography of Palestine. Population Studies 2(1):92-114. June, 1948.

"The objections which Dr. Bromberger raises against official vital statistics in Palestine [see Title 1731, this issue] are considered...and Dr. Bromberger's methods of estimates are carefully examined. While defects in the statement of ages and some under-registration of Moslem deaths are admitted, the conclusion is reached that there is no inherent inconsistency in the published figures, and that any errors would not affect the differential rates of growth of the Arab and Jewish populations."

1756. Milbank Memorial Fund.

International approaches to problems of undeveloped areas. Milbank Memorial Fund Quarterly 26(3):245-316. July, 1948.

This issue contains nine of the papers presented at a Round Table held in connection with the 1947 Annual Conference of the Milbank Memorial Fund, November 19-20, 1947. For individual citations, see Titles 1734, 1739, 1754, 1758, 1765, 1766, 1782, 1959, and 2176, this issue.

1757. Mohammad Awad Mohammad.

The problem of over-population in Egypt. Modern Egypt, News Bulletin, Press Section, May, 1948. Pp. 33-35.

The director of the Sudan Institute of the Faculty of Letters of King Fouad I University appears to see birth control as the only practical means of combating overpopulation.

1758. Notestein, Frank W.

Summary of the demographic background of problems of undeveloped areas. Milbank Memorial Fund Quarterly 26(3):249-255. July, 1948.

"The author cites the capacity for rapid growth as the common demographic characteristic of undeveloped areas, em-

phasizes the importance of demographic factors in economic planning, and suggests several ways in which an international demographic agency, such as the Population Commission of the United Nations, might contribute toward the ultimate achievement of a balanced modernization of undeveloped areas."

1759. Ogburn, William F., and Adams, Jean L.

Are our wars good times? Scientific Monthly 67(1):23-33. July, 1948.

Various social and economic trends in the United States during recent wars are compared with peacetime trends on the basis of statistical records of divorces, marriages, births, deaths, production, unemployment, national income, and other indices.

1760. Ramamurthi, B.

Demographic trends in Asian countries. India Quarterly 3(3):258-273. July-Sept., 1947.

A resume of growth of world and Asian populations, with summaries for regions of Asia.

1761. Ruiz Almansa, Javier.

Ideas and statistics on population in Spain during the sixteenth century. (Las ideas y las estadísticas de población en España en el siglo XVI.) Revista Internacional de Sociología 5(19):89-107. July-Sept., 1947. [Summary in English and French]

A survey of the problems raised by the structure of the population of sixteenth century Spain, particularly the presence of ethnic and religious minorities and the formation of social classes. The creation of a statistical administrative machinery by Philip II is described and evaluated.

1762. Sauvy, Alfred.

Social and economic consequences of the ageing of Western European populations. Population Studies 2(1):115-124. June, 1948.

The author considers some of the effects of the increasing proportion of old people in Western Europe. "As the old must be provided for by social security schemes, which are ultimately financed by the working population, the burden on the producer is likely to increase and may become, so heavy that it will be resented and evaded. Some possible remedies are discussed, including postponement of the retiring age, and the immigration of workers from Mediterranean countries and possibly from outside Europe. The future of migration movements in Britain is also considered."

1763. Simoulevitch, B.

Some questions on repopulation in foreign countries. (Niékotorye voprossy vosproizvodstva nassélénié v zaroubiéjnykh stranakh.) Mirovoie Khoziaisto i Mirovala Politika, No. 3, March, 1947.

Contents: The demographic situation in various European countries after the Second World War; Consideration of three types of areas--increasing, stationary, and declining population; Natality and mortality in the various countries, and in urban and rural areas; Foreign opinions on these questions. [B.A.D.P.E.S. 2(4): 3438]

SOUTH AMERICA

Argentina

1830. Argentina. Dirección General de Estadística y Censos.

Vital statistics. (Movimiento de población.) Síntesis Estadística Mensual de la República Argentina 2(2):86-87. Feb., 1948.

Includes an estimate of total population as of the end of 1947.

1831. Argentina. Ministerio de Relaciones Exteriores y Culto.

Argentina's fourth census. (IV censo nacional de la República Argentina.) Informaciones Argentinas, No. 110. April-May-June, 1947.

Provisional data for some city populations are included.

Bolivia

1832. Bolivia. Dirección General de Estadística.

Demography, 1944. (Demografía, 1944.) La Paz, 194[?]. 598 pp.

Brazil

1833. Almeida, João C.

Population of São Paulo, July 31, 1945. (População de São Paulo, 31-VII-1945.) Boletim do Departamento Estadual de Estatística, São Paulo, No. 3, pp. 35-47. 1947.

1834. Brazil. Instituto Brasileiro de Geografia e Estatística. Conselho Nacional de Estatística.

Analysis of the results of the population census. Supplementary occupations. (Análises de resultados do censo demográfico. Ocupação suplementar.) Boletim Estatístico 5(20):6-11. Oct.-Dec., 1947.

Analysis of the results of the population census. Position in the occupation, by various branches of activity of the population of Brazil. (Análises de resultados do censo demográfico. A posição na ocupação, nos diversos ramos de atividade da população do Brasil.) Ibid. 6 (21):5-15. Jan.-March, 1948. [Whether employer, employee, member of the family, or self-employed, by principal types of occupation.]

1835. Brazil. Instituto Brasileiro de Geografia e Estatística. Conselho Nacional de Estatística.

Statistical abstract of Brazil, 1946. Sinopse estatística do Brasil, 1946. Rio de Janeiro, Serviço Gráfico do Instituto Brasileiro de Geografia e Estatística, 1947. 267 pp.

The section on "Demography," pp. 19-39, includes population by age, sex, and mar-

ital status at each census date, 1872-1940; characteristics of the population by units of the Federation according to the 1940 census; population by counties and for cities over 10,000; birth and death rates; immigration and emigration, 1941-1945; and life tables for seven selected capitals, based on mortality statistics of 1939-1941. Table headings are in Portuguese, English, and Esperanto. This is the first issue of the Abstract since 1940.

1836. Rodrigues Perdigão, Manuel D.
Calculation of the populations of the state and the capital. (Calculo das populações do estado e da capital.) Boletim do Departamento Estadual de Estatística, São Paulo, No. 3, pp. 84-91. 1947.
Adjustment of a second degree parabola to the data of the censuses from 1872 to 1940.

British Guiana

1837. United Kingdom. Colonial Office.
Annual report on British Guiana for the year 1946. Colonial Annual Reports. H. M. Stationery Office, 1948[?].
For indication of contents, see 14(3): 1307 and Title 1800, this issue.

Chile

1838. Chile. Dirección General de Estadística.
Population census, 1940. (Censo de población, 1940.) Estadística Chilena 19(3):92-111. March, 1946. [Education by provinces. Detailed data on age, civil status, education, occupations, and religion for the Provinces of Concepción and Arauco.]
Population census, 1940. Provinces of Chiloé, Aysén, and Magallanes. (Censo de población, 1940. Provincias de Chiloé, Aysén, y Magallanes.) Ibid. 19(7):416-439. July, 1946.
For reference to earlier publications of the census returns, see: 12(1):64; 12(2):545; 12(3):1074; 13(1):82; 13(2): 678; and 13(4):1725.

1839. Chile. Dirección General de Estadística.
Demography. (Demografía.) Estadística Chilena 20(11):475-478. Nov., 1947.
Contains vital statistics for the years 1937-1946, and for 1946 by months through November.

Peru

1840. Peru. Dirección General de Salud Pública.
The demography of the principal cities of Peru in 1946. (La demografía de las principales ciudades peruanas en el año 1946.) Lima, 1947. 9 tables.

1841. Peru. Dirección Nacional de Estadística.
Statistical yearbook of Peru, 1946. (Anuario estadístico del Perú, 1946.) Lima, 1948. L, 605 pp.
Section II, "Demography," pp. 23-86.

1842. Peru. Dirección Nacional de Estadística.
National census of population, 1940. Vol. IV. Departments: Huánuco, Junín. (Censo nacional de población de 1940. Volumen IV. Departamentos: Huánuco, Junín.) Lima, Imprenta Torres Aguire, 194-. XI, 93 pp.; XV, 135 pp.
Detailed census data on size, distribution, age, marital status, fertility, race, occupation, etc.
For reference to earlier volumes, see 14(2):688.

1843. Peru. Dirección Nacional de Estadística.
Population estimated as of December 31, 1947, and census of June 9, 1940, by zones, departments, and provinces. (Población general de la República, calculada al 31-XII-47 y censada el 9-VI-40, por zonas, departamentos y provincias.) Boletín de Estadística Peruana 8(3):11-12. July-Sept., 1947. [Published in March, 1948]

Surinam

1844. Surinam.
Surinam report, 1940. I. Text of the report on Surinam for the year 1939. (Surinamsch verslag, 1940. I. Tekst van het verslag van bestuur en staat van Suriname over het jaar 1939.) Rijksuitgeverij, 's Gravenhage, 1947. 96 pp.
Surinam report, 1940. II. Statistical annual of Surinam for the year 1939. (Surinamsch verslag, 1940. II. Statistisch jaaroverzicht van Suriname over het jaar 1939.) Rijksuitgeverij, 's Gravenhage, 1947. 180 pp. [Contains data on nationalities, religions, age, and vital statistics.]

Venezuela

1845. Venezuela. Dirección de Salubri-

dad Pública.

Yearbook of epidemiology and vital statistics, 1945. (Anuario de epidemiología y estadística vital, año 1945.) Caracas, Editorial Grafolit, 1947. XXIII, 537 pp.

EUROPE

Austria

1846. Austria. Linz. Statistisches Amt.
Statistical yearbook. (Statistisches Jahrbuch.) Linz, 1946-.

Belgium

1847. Belgium. Institut National de Statistique.
Demography and health. (Démographie et hygiène.) Bulletin de Statistique 34 (4):339-350. April, 1948.
Includes estimated population by province as of December 31, 1947; vital statistics for 1947 by province and arrondissements; and a summary of vital statistics since 1900 for the country as a whole.

Czechoslovakia

1848. Czechoslovakia. State Statistical Office.
Sex, age distribution and marital status of the Czechoslovak population in 1947. By Vr. Srb. Statistical Bulletin of Czechoslovakia 3(5):79-80. 1947[?]. [In English]
General presentation of data on age distribution, 1900-1947, with emphasis on the status in 1947.

1849. Czechoslovakia. Státní Uřad Statistický.
Area and population. Vital statistics. (Plocha a obyvatelstvo. Přirozená měna obyvatelstva.) Statistický Zpravodaj 11 (7-8):292. July-Aug., 1948.
Population of Czechoslovakia as of May 31, 1948, and vital statistics through May, 1948.

1850. Czechoslovakia. Státní Uřad Statistický.
Vital statistics in Czechoslovakia in 1947. (Přirozená měna obyvatelstva v Československu 1947.) By Vr. Srb. Statistický Zpravodaj 11(5):173-176. May, 1948.

1851. Sekera, Václav.
A short population census taken in 1947. Method and organization. (Soupis obyvatelstva 1947. Methoda a organisace.) Statistický Obzor 28(1):12-27. March, 1948.
A description of the methods and objectives of the short census taken in Slovakia on October 4, 1946, and in Bohemia, Moravia and Silesia on May 22, 1947. "The idea underlying the May Census was greatest possible economy. The scope of the Census was defined to embrace the strictest minimum of subject-matters: sex, age, family status,...[occupation], branch in which employed, category of social insurance and residence as on May 1, 1945. The Census was carried out without any enumerators being appointed except for the four largest towns. The heads of households filled out the schedules themselves and they surrendered them to the local authorities on the day and on the premises of food cards issue."
There is a summary in French and English.

Denmark

1852. Denmark. Statistiske Departement.
Vital statistics, 1946. (Befolkningens Bevaegelser, 1946.) Statistiske Meddelelser, 4 Raekke, 126 Bind, 6 Haefte. Copenhagen, 1948. 50 pp.

France

1853. Bourgeois-Pichat, Jean.
The demographic situation. (La situation démographique.) Population 3(1): 147-157; 3(2):361-366. Jan.-March and April-June, 1948.
Trends in marriages, births, deaths, and immigration in France, 1947 and 1948.

1854. France. Institut National de la Statistique et des Etudes Economiques.
Vital statistics in 1947. (Mouvement de la population au cours de l'année 1947.) Bulletin de la Statistique Générale de la France 36(5-6):209-217. May-June, 1948.
By departments.

1855. Vincent, Paul.
The future increase of school children. (L'accroissement futur des effectifs scolaires.) Population 3(2):345-348. April-June, 1948.
A brief summary of administration problems and programs necessitated by the increase in the birth rate since the war. Includes estimates of the number of chil-

dren of scholastic ages in France for each year to 1959.

Germany

Zonal Publications

1856. Germany. British Zone. Headquarters, Control Commission for Germany (British Element).

Monthly Report of the Control Commission for Germany (British Element). Vols. 2 and 3. 1947 and 1948.

Households classified by type, size, and number of occupants as per population census 1946. 2(11):18-19. Nov., 1947.

Population classified by age (single years) and by family status. 2(12):8-13. Dec., 1947.

Evacuees, refugees, expellees taken into and departing from the British Zone. 3(1):47. Jan., 1948.

Prisoners of war and displaced persons. 3(2):21. Feb., 1948.

Manpower. 3(2):26-28. Feb., 1948.

Public health. 3(2):34-35. Feb., 1948.

Legal separations. 3(2):64; 3(3):60. Feb. and March, 1948.

1857. Germany. British Zone. Headquarters, Control Commission for Germany (British Element).

Monthly Statistical Bulletin of the Control Commission for Germany (British Element). Vol. III, No. 4. April, 1948. 130 pp.

Section I, "Population," pp. 61-82, includes 21 tables (Nos. 201-221): 201. Germany: area and population of the four zones of occupation and Berlin according to the provisional result of the population census at 29 October 1946, with corresponding figures for 17 May 1939; 202. Area, population and density per sq. km. as per population census at 29 October 1946; 203. Population census at 29 October 1946 and 17 May 1939 and cities with more than 100,000 inhabitants; 204-210. Population classified as per population census at 29 October 1946, by age groups and by marital status; by age groups; by religious creeds; by national descent and nationality; by nationality and national descent; by mother tongue; by nationality and mother tongue; 211. Persons living in private households and institutions (29 October 1946); 212. Population and special cases (persons enumerated by British authorities) classified by place of residence 1 September 1939 (as per 29 October 1946); 213. Population classified by land of birth (29 October 1946); 214. Displaced persons and ex-prisoners of war held and repatriated or moved to employment abroad; 215. Marriages, births, deaths and infant mortality; 216. Marriages, births, deaths and infant mortality--British Sector, Berlin; 217. Causes of deaths--Berlin and British Sector, Berlin; 218. Divorces during 1947: analysis by cause; 219. Deaths occurring in 1946 and 1st half-year 1947 by year of birth; 220. Causes of deaths by age groups--1st half-year 1947; 221. Persons who have completed university education or specialized training (29 October 1946). The tables on national descent, nationality, mother tongue, and divorces by cause are new additions to this section.

Section III, "Health," pp. 85-90, includes 6 tables (Nos. 223-228): 223-227. Notifiable diseases: cases reported, British Sector, Berlin; cases and deaths reported 1938, 1946, 1947 (numbers and rates); cases and deaths (numbers and rates); 228. Hospitals under German supervision and administration.

1858. Germany. Soviet Zone. Statistisches Zentralamt.

Berlin's population in graphs. (Berlins Bevölkerung im Zahlenbild.) Statistische Praxis 1(1):5-6. Oct., 1946.

Age pyramid, single years, 1939 and 1945, on frontispiece.

1859. Germany. Soviet Zone. Statistisches Zentralamt.

Population balance, 1945. (Bevölkerungsbilanz 1945.) Statistische Praxis 1(1):21-22. Oct., 1946.

A comparison of the population as of the end of 1945 by age and sex with that expected in the absence of war and migration.

1860. Germany. Soviet Zone. Statistisches Zentralamt.

Population development, 1939-1946, in the districts of the Soviet Zone. (Die Bevölkerungsentwicklung 1939-1946 in den Kreisen der Sowjetischen Besatzungszone.) Statistische Praxis 2(2):29-32. Feb., 1947.

"Wohnbevölkerung," 17 May, 1939; "Ortsanwesende Bevölkerung," 29 Oct., 1946, total and by sex; percent change since 1939.

1915. Switzerland. Eidgenössisches Statistisches Amt. Bureau Fédéral de Statistique.
Population census, December 1, 1941. Vol. 21. Switzerland. Tables. Part I. (Eidgenössische Volkszählung 1. Dezember 1941. Band 21. Schweiz. Tabellenteil I. Recensement fédéral de la population 1941. 21me Volume. Tableaux. Ière Partie.) Statistische Quellenwerke der Schweiz, Heft 198. Bern, 1948. 34*, 445 pp. [In German and French]
This first part of the summary of the 1941 census includes the following sec-

tions:

1. Häuser und Haushaltungen seit 1860; Bevölkerung seit 1850 - Maisons habitées et ménages, depuis 1860; population, depuis 1850. Pp. 2-10. [Contains vital statistics by cantons since 1870.]

2. Heimat - Origine. Pp. 12-26.

3. Geburtsort - Lieu de naissance. Pp. 28-36.

4. Konfession - Religion. Pp. 40-48.

5. Muttersprache - Langue. Pp. 50-54.

6. Zivilstand und Alter - Etat civil et âge. Pp. 56-92.

7. Erwerbszweige, persönliche Berufe; Schweiz - Branches économiques, professions individuelles; Suisse. Pp. 99-445.

For reference to earlier volumes of the census, see 14(1):111.

United Kingdom

1916. England and Wales. General Register Office.

Matters of life and death. London, H. M. Stationery Office, 1948. 20 pp.

A brief, non-technical survey of the principal demographic characteristics of England and Wales, based on official publications of the General Register Office. The first section, "From Doomsday Book to to-day," traces the growth of population from 1801 to 1947; the second, "Elements in the story," deals with migration, births, and deaths; and the last chapter, "The number and condition of the people," considers the problem of population replacement, or the reproduction rate, the marriage rate, and the changing age composition. Appendix I presents tables showing the total population, births, marriages, deaths, and infant mortality, and the population by age, 1841-1947. The last appendix lists the official publications of the General Register Office.

1917. England and Wales. Registrar-General.

Quarterly return. Births, deaths and marriages registered in the quarter ended 31st March, 1948, and the year, 1947.... Estimates of national and local populations....No. 397. London, H. M. Stationery Office, 1948. 32 pp.

1918. England and Wales. Registrar-General.

Statistical review of England and Wales for the year 1943. Tables. Part I. Medical. New Annual Series, No. 23. London, H. M. Stationery Office, 1948. 322 pp.

Includes estimated total and civilian population in 1943, and births, deaths, and infant mortality for 1943.

1919. Pickard, Ransom.

The population and epidemics of Exeter in pre-census times. Exeter, Printed for the author by James Townsend, 1947. 83 pp.

"The ratios of births to population as ascertained during the census years of the nineteenth century are assumed to have remained generally uniform in their range throughout the previous centuries examined in Exeter. By multiplying the numbers of Exeter Registers of baptisms by the ascertained censal period maximum, mean and minimum ratios of births to Exeter populations and making certain corrections for omissions in the Registers, etc., population figures for any period are estimated. These maximum, mean and minimum populations for each decennium from 1580 to 1800 have thus been calculated." [Journal of the Royal Statistical Society 110(3):269]

China

1923. Alexander, John W.

The prewar population of China: distribution and density. Annals of the Association of American Geographers 38(1): 1-5, Maps. March, 1948. (Cont.)

"The main purpose of this study is to present the prewar distribution and density of population in China by means of two maps, each by a different method, and to interpret the broader aspects of density and distribution patterns revealed by them--patterns prevailing before the dislocation of population which was provoked by the Japanese invasion. The source materials employed in the preparation of the maps were all compiled and published in China."

1924. China. Directorate of Statistics.
Population. The Statistical Monthly, Nos. 125-126 and 127-128. Jan.-Feb., and March-April, 1948.
Population change in principal cities. Nos. 125-126, pp. 22-25. [Households and population, by sex, annually 1937-1946, monthly 1947 and 1948, for Chengtu, Chinkiang, Chungking, Kweisui, Kweiyang, Lanchow, Nanchang, Ninghsia, Sian, Sunyang, Taiyuan, Tientsin, Tsinan, Tsingtao, Wuchang. Data are those reported by the Police Bureaus.]
Foreign population in China, Feb., 1948. Nos. 125-126, p. 26.
Population in principal cities, March, 1948. Nos. 127-128, p. 18.

1925. Chu, Tsu Huei.
On the composition and size of population with reference to the population census in China. The Statistical Monthly, Nos. 127-128, pp. 1-2. March-April, 1948. [In Chinese]

1926. Liu, Ta-chün.
China's economic stabilization and reconstruction. Published under the auspices of the Sino-International Economic Research Center, New York, and the China Institute of Pacific Relations, Shanghai. New Brunswick, Rutgers University Press, 1948. x, 159 pp.
The provincial and city populations from the "1947 census of China" are given in Appendix I, with a detailed note on the sources of the various estimates.

India

1927. Hoffman, Lawrence A.
India: main population concentrations. Geographical Journal 111(1-3):89-100. July, 1948.
An analysis of concentrations in India: population, land-use, urban and communal, and population increase, 1891-1941. The data are based on the censuses of 1941 for India, 1940 for Portuguese India, and 1941 for French India. The article was written in 1943; a postscript takes account of recent developments.

1928. Meile, Pierre.
The population of India. (La population de l'Inde.) Population 3(1):127-146. Jan.-March, 1948.
An analysis of the demographic situation of India, dealing with growth of the population, 1881-1941; the territorial distribution, with the population of each province and Native State; rural-urban distribution and population of specific cities; sex and age composition; births and deaths; estimates of future growth; and religious composition. An appendix includes a discussion of the division into India and Pakistan.

Iraq

1929. Himādah, Sa'īd.
The economic organization of Iraq. (Al-nizām al-igtisādi fi'l 'Irāq.) American University of Beirut. Publications, Social Science Series, No. 13 A. Beirut, 1938. 660 pp.
Ch. 2, "Population," pp. 9-62, contains data on total population by Liwas, density, ethnic and religious composition, births and deaths, education, and migration. [G. Sabagh]

Japan

1930. Japan. Supreme Commander for the Allied Powers. General Headquarters.
Population census. Summation of nonmilitary activities in Japan. No. 29, pp. 285-289. Feb., 1948.
Figures: 1. Population trends, 1920-1947; 2. Population of cities of 100,000 and over, Oct. 1, 1947; 3. Population by prefectures; 4. Population density; 5. Population, monthly change since Oct. 1, 1945.

Korea

1931. Korea. South Korea Interim Government, Office of Administration. Census Division.
Population statistics, 1944 and 1947. Seoul, 1948. 52 pp.

Palestine

1932. Anglo-Palestine Publications, Ltd.
The Anglo-Palestine year book, including also "The Middle East," 1947-1948.

Edited by F. J. Jacoby. London, 1948. 368 pp.

There are sections on "Peoples" and on "Vital statistics" in this second issue of the Year Book.

Philippine Islands

1933. Philippines. Office of the President. Public Relations Office.

Blue book; first anniversary of the Republic of the Philippines. Manila, Bureau of Printing, 1947. viii, 405 pp.

1934. Turkey. Office Central de Statistique.

Statistical yearbook, 1942-1945. Vol. 15. (Annuaire statistique, 1942-45. Vol. 15.) Publication No. 255. Ankara, 194-. 535 pp.

1935. Turkey. Office Central de Statistique.

General census of the population, October 21, 1945. Vol. 1. (Recensement général de la population au 21 octobre 1945. Vol. 1.) Publication No. 286. Ankara, 1948. 649 pp.

Population and area for provinces, districts, communes, and villages.

AFRICA

Kenya

1936. United Kingdom. Colonial Office.

Annual report on the Colony and Protectorate of Kenya for the year 1946. Colonial Annual Reports. London, H. M. Stationery Office, 1948[?].

For indication of contents, see 14(3): 1307 and Title 1800, this issue.

Mauritius

1937. United Kingdom. Colonial Office.

Annual report on Mauritius for the year 1946. Colonial Annual Reports. London, H. M. Stationery Office, 1948. 139 pp.

For indication of contents, see 14(3): 1307 and Title 1800, this issue.

Nyasaland

1938. United Kingdom. Colonial Office.

Annual report on Nyasaland for the year 1946. Colonial Annual Reports. London, H. M. Stationery Office, 1948. 60 pp.

For indication of contents, see 14(3): 1307 and Title 1800, this issue.

Seychelles

1939. United Kingdom. Colonial Office.

Annual report on Seychelles for the year 1946. Colonial Annual Reports. London, H. M. Stationery Office, 1948. 48 pp.

For indication of contents, see 14(3): 1307 and Title 1800, this issue.

The chapter on "Population" contains an estimate of the population for 1946 and birth and death rates for 1942-1946.

Swaziland

1940. United Kingdom. Colonial Office.

Annual report on Swaziland for the year 1946. Colonial Annual Reports. London, H. M. Stationery Office, 1948[?].

For indication of contents, see 14(3): 1307 and Title 1800, this issue.

Tunisia

1941. Tunisia. Service Tunisien des Statistiques.

The statistical yearbook of Tunisia. (L'annuaire "Statistique Générale de la Tunisie.") Paris, 1948.

This volume, the first since 1939, is revised to conform to the yearbook for metropolitan France. Part 2, "Area and population," includes data from the 1946 census.

Uganda

1942. United Kingdom. Colonial Office.

Annual report on Uganda for the year 1946. Colonial Annual Reports. London, H. M. Stationery Office, 1948. 112 pp.

For indication of contents, see 14(3): 1307 and Title 1800, this issue.

Union of South Africa

1943. Sadie, J. L.

European population movements in S. A. during World War II. South African Journal of Economics 16(1):51-69. March, 1948.

This analysis of demographic trends among the European population in the Union of South Africa, 1941-1946, deals with trends in migration, and vital statistics. There is an abridged life table based on the age distribution of the population according to the census of 1941 and deaths according to age during the three years 1940-1942. True rates of natural increase and the age structure of a stable popula-

tion have also been computed. The final section considers the prospects for future growth, comparing the estimates of D. Glass for 1940 and 1945 with actual populations in 1941 and 1946, and estimating the probable size of the population in later years.

The author believes that "even more important than the trend in European population growth, however, is the racial differential in fertility," as a result of which the relative size of the European minority is shrinking.

1944. Union of South Africa. Office of Census and Statistics.

Official yearbook of the Union of South Africa and of Basutoland, Bechuanaland Protectorate and Swaziland. No. 23, 1946. Pretoria [?], 1947.

Zanzibar

1945. United Kingdom. Colonial Office.

Annual report on Zanzibar for the year 1946. Colonial Annual Reports. London, H. M. Stationery Office, 1948[?].

For indication of contents, see 14(3): 1307 and Title 1800, this issue.

OCEANIA

Australia

1946. Australia. Commonwealth Bureau of Census and Statistics.

Census of the Commonwealth of Australia, 30th June, 1947. Canberra, Commonwealth Govt. Printer, 1948.

The following Census Bulletins have been issued to date:

No. 1. Population of states and territories. Urban and rural population. 11 pp.

No. 2. Population in local government areas. 15 pp.

No. 3. Summary for the Australian Capital Territory. 10 pp.

1947. Australia. Commonwealth Bureau of Census and Statistics.

Population and vital statistics. Quarterly Summary of Australian Statistics, Bulletin No. 190, pp. 3-8. Dec., 1947.

Preliminary results of the census of June 30, 1947, showing population by state or territory and by sex; vital statistics and migration through September, 1947.

New Caledonia

1948. France. Ministère de la France d'Outre-Mer and Institut National de la Statistique.

Results of the 1946 census in the Colonies: New Caledonia. (Résultats du recensement de 1946 dans les Territoires d'Outre-Mer: Nouvelle Caledonie.) Bulletin Mensuel de Statistique d'Outre-Mer, Supplément, Série Statistique, No. 6. Paris, 1947. 47 pp.

New Zealand

1949. New Zealand. Census and Statistics Department.

Population. Monthly Abstract of Statistics, May, 1948. Pp. 6-11.

Population estimates, including and excluding Maoris, as of March 31, 1948, and vital statistics through March, 1948.

1950. New Zealand. Census and Statistics Department.

Population census, 1945. Vol. II. Island Territories: Cook Islands and Niue, Tokelau Islands, Western Samoa. Auckland, Leightons Ltd., 1947. 14 pp.

For Cook Islands and Niue there are detailed tables showing population at successive censuses, age distribution, birthplace, religion, racial origin, literacy, duration of residence of population other than Native, occupation, etc. Summary data are given for Tokelau Islands and Western Samoa.

For reference to Vol. I, see 14(2):754.

INTERCONTINENTAL

1951. Gasc, Paul.

Demographic report. (Chronique de démographie.) Journal de la Société de Statistique de Paris 89(3-4):119-128. March-April, 1948.

Trends in the total population of France and its distribution, and vital statistics for France in 1946. The final section contains a table showing vital rates for various countries of the world, 1938 and 1944-1946.

1952. Henry, Louis.

The sex-ratio by age in the census. (La masculinité par âge dans les recensements.) Population 3(1):93-114. Jan.-March, 1948.

"In a closed population subject to normal mortality, sex-ratio--that is the ratio between the number of men and women of same age--would appear varying little

and slowly from the end of the first year to the middle period of adult life. In spite of perturbations caused by wars and migrations, this law shows up certain flaws in census findings. The article deals principally with these facts." [English summary]

1953. Portugal. Instituto Nacional de Estatística.
Statistical yearbook of the Colonial Empire, 1946. (Anuário estatístico do Império Colonial, 1946.) Lisboa, 194-. 143 pp.

1954. United Nations. Statistical Office.
Population. Monthly Bulletin of Statistics 2(7):2-23. July, 1948. [Bilingual, French and English]
The following tables are included:
1. Estimates of total population. Pp. 2-5.
2. Marriages. Pp. 6-8.
3. Marriage rates. Pp. 9-11.
4. Births. Pp. 12-14.
5. Crude birth rates. Pp. 15-17.
6. Deaths. Pp. 18-20.
7. Crude death rates. Pp. 21-23.

III: MORTALITY

General

1955. Bergman, R. A. M.
Who is old? Death rate in a Japanese concentration camp as a criterion of age. Journal of Gerontology 3(1):14-17. Jan., 1948.
"Analyzing the population and death rate figures of a Japanese concentration camp, [the author] found that age was a definite factor in determining survival or death of the prisoners."

1956. Bose, Atindranath.
Social and rural economy of northern India, circa 600 B.C.-200 A.D. Calcutta, University of Calcutta, 1942-45. 2 vols.
Vol. I, Ch. VIII, "Famine and irrigation."

1957. Ehrlich, V. Z.
Pulmonary tuberculosis and season of birth. American Review of Tuberculosis 55(1):160-169. 1947.
"The author studies files of the New York City Board of Health tuberculosis bureau, recording date of birth in the northern hemisphere of individuals dead strictly of pulmonary forms of tuberculosis. 5986 cases are recorded. Persons born in August and September were most numerous....Least numerous were persons born in May....The difference is stated to be statistically significant and very unlikely by chance." [B.A. 22(1):159]

1958. Elderton, William P.
Merchant seamen during the war. Journal of the Institute of Actuaries 73 (Part 2, No. 337):250-272. Discussion, pp. 273-284. 1947.
Deals with the mortality and sickness of British merchant seamen during the war.

1959. Forrest, William P.
Health aspects of international approaches to problems of undeveloped areas. Milbank Memorial Fund Quarterly 26(3): 280-291. July, 1948.
"The author traces briefly the evolution of international attitudes toward health from the first international concern over sanitation and a few communicable diseases to the broad scope of the philosophy underlying WHO."

1984. Collins, Selwyn D.
Illness among infants, with comparative mortality data. Public Health Reports 63(20):637-662. May 14, 1948.
On the basis of data obtained from five different illness studies conducted by periodic canvasses of families within the past twenty-five years in the United States, trends in illness among infants are studied and compared with trends in infant mortality. The analysis deals with age variation for all causes, broad and specific causes of illness and mortality, and actual rates of illness and mortality.

1988. Tabah, Léon, and Sutter, Jean.
The respective influence of age of mother and birth order on infants born dead. The concept of lethality. (Influence respective de l'âge maternel et du rang de naissance sur la mortinatalité. La notion de létalité.) Population 3(1): 63-92. Jan.-March, 1948.
Infants born dead are "more common among children born of older mothers and in the higher parity of birth. Applying a method for dissociating both factors through French, Italian, American and English statistics, the respective influence of each of them is displayed. The cause of the phenomenon is solely the age of the mother and the phenomenon itself cannot be properly understood, if not approached by a lethality concept." [English summary]

2002. Bourgeois-Pichat, Jean.
A new index for measuring fecundity. (Un nouvel indice de mesure de la fécondité.) Population 3(2):293-312. April-June, 1948. (Cont.)

"A critical review of the various demographic indices demonstrates that at present the fecundity rates based on both maternal age and duration of marriage are the most appropriate for studying the facts of birth. Since these rates are presented in confusing tables of about 200 coefficients, an investigation has been made to see if the 200 coefficients thus computed were really indispensable....This analysis has shown that actually three coefficients are sufficient for representing each table as a whole. Because two of these three vary only slightly, the third is proposed as an index of the measure of fecundity. In conclusion, some practical applications are made." [English summary]

The measurement of reproduction and natural increase. (La mesure de la reproduction et de l'accroissement naturel.) Population 3(2):271-292. April-June, 1948.
The author considers two major difficulties involved in the measurement of reproduction: (1) the elimination of the disagreement between the values of the same index separately computed for each sex; and (2) the determination of a tendency value corresponding to the situation of the moment. In analyzing conditions for observing demographic phenomena he shows that "the proposed solutions can emerge from the theoretical domain only when the statistical material placed at the disposal of demographers has been improved." A method of computing the age distribution and matrimonial status of a stable population is also developed. [English summary]

The increase of the birth rate in the world: its causes and the probability of its continuation. (La reprise de la natalité dans le monde: ses causes, ses chances de durée.) Population 3(2):249-270. April-June, 1948.

After analyzing trends in the birth rate throughout the world since the beginning of the First World War, the author summarizes the "results of the international inquiry taken by the Institut National d'Etudes Démographiques and then presents a general view of the overall situation. Several reasons can be given for this increase in the birth rate: economic conditions, institutional factors and the direct influence of the war. While the last mentioned is an occasional factor, the others represent greater stability and consequently lead to the conclusion that the probable diminution of the birth rate figures will be less pronounced after this recent war than after the preceding one." VIII: CHARACTERISTICS

Social and Economic

2125. Achner, Leonhard.

Estimate of the number of persons per dwelling. (Zur Berechnung der Wohndichte.) Bayern in Zahlen 1(2):29-31. Feb., 1947.

Average number of persons per room for the Stadt- und Landkreise.

2126. Austria. Statistisches Zentralamt.

Results of agricultural statistics, 1937-1944. (Ergebnisse der Landwirtschaftlichen Statistik in den Jahren 1937-1944.) 194[?]. 205 pp.

2127. Baldwin, Hanson W.

The price of power. New York, Published for the Council on Foreign Relations by Harper, 1948. xii, 361 pp.

Ch. XIII, "Man, the central problem," emphasizes the transition from cannon-fodder to quality as the essential fact.

2128. Brousse, H.

The productivity of agricultural workers in France and in foreign countries. (La productivité de la main-d'oeuvre agricole en France et à l'étranger.) Bulletin de la Statistique Générale de la France, Vol. 36, Quarterly Supplement, April-June, 1948. Pp. 1-128.

A section defining the terms used is followed by a discussion of the difficulties met in comparing French agricultural productivity with that of other countries, and the solutions that were adopted. The results of the study are presented in a table showing for twenty-one countries the volume of total agricultural production, the proportions corresponding to vegetable and animal products, and the relation of production to the active population. Finally, the work of other students in the field is reviewed, particularly that of Colin Clark, and the conclusion stresses the need for the establishment of common definitions and methods. An appendix lists basic population and agricultural facts for each of the countries.

2129. Buiskool, Johannes A. E.

Surinam, present and future: a social-economic and political survey. (Suriname nu en straks: een sociaal-economische en staatkundige beschouwing.) Amsterdam, W. L. Salm, 1946. 247 pp.

The Bavarian Economist. Vol. 1, No. 1, Nov., 1946. München [?], Publishing Operations Branch, Information Control Division, 1946-.
This monthly journal is intended as "a general reference source depicting the development and trends of economic life of Bavaria." The section on "Statistical Tables" includes current series on employment and occasional data on population. The issue for November, 1946,

includes tables on population by consumer categories, monthly from June, 1945, classified as normal consumers, partly self-suppliers, full self-suppliers, persons in institutions, and total population. There is an additional distribution by moderately heavy workers, heavy workers, very heavy workers, and expectant and nursing mothers. The table on "Labor force and allocation," includes monthly, by sex, the number unemployed by employable status, the number placed during the month, the new registrations, and the job openings at the end of the month.

The standard of living of families: household budgets in 1946. (Les conditions d'existence des familles: Les budgets familiaux en 1946.) Population 3(1):11-46. Jan.-March, 1948.

"This article gives detailed results of the fourth enquiry into family budgets carried on by the Institut National d'Etudes Démographiques. This survey of 891 units in the Paris region was carried out in October-November 1946. It presents an overall picture of the standard of living of families at that time. The analysis of the food ration correlates consumption with expenditure and shows to what extent vital needs have been met." [English summary]

2152. Heberle, Rudolf.

The labor force in Louisiana. Baton Rouge, La., Louisiana State University Press, 1948. 189 pp.

A study of the composition and distribution of the labor force in Louisiana carried on under the auspices of the Institute of Population Research at Louisiana State University. Based largely on data from the 1940 Census of Population, the analysis deals with the proportion of the population in the labor force, the industrial and geographic distribution of the employed workers, sex and color composition of the labor force, the socioeconomic position of employed workers, the age distribution, the relations of the family to the labor force as shown by the marital status of female workers and employment of children, and finally, the wartime changes and postwar outlook.

A report on the implementation of the National Mental Health Act. "To give a concrete picture of the various ways in which grant-in-aid funds are being used, a brief summary is presented of three State programs: Virginia, California, and Montana."

2215. Fraser Roberts, J. A., and Slater, Eliot.

Genetics, medicine and practical eugenics. Eugenics Review 40(2):62-69. July, 1948.

Two principal types of inheritance are distinguished: that due to single genes and that due to the combination of many genes. Consideration is then given to the eugenic significance of each type, the scope for eugenic action in regard to each, and the problem of the differential birth rate with respect to intelligence.

2216. Goldstein, Marcus S.

Infants of Mexican descent. I. Physical status of neonates. Child Development 18:3-10. 1947.

Comparison of body weight of Mexican infants born in the United States with that of infants born in Mexico and with newborn of other ethnic stocks of a similar economic level. There is also a comparison of incidence of prematurity. [C.D.A.B. 21(5-6):514]

2217. Harris, H.

On sex limitation in human genetics. Eugenics Review 40(2):70-76. July, 1948.

Discusses the genetic aspects of the inheritance of certain diseases which are more common among one sex than the other, such as color blindness, haemophilia, diabetis mellitus, etc.

2218. Khanolkar, V. R.

The racial distribution of the blood groups. Journal of the Anthropological Society of Bombay n.s. 1(1):110-133. 1946.

"Classifications of mankind into races according to techniques employed by archaeologists, philologists and anthropologists present serious drawbacks. A classification of past or present groups of human beings would be more satisfactory if they could be based on characters whose genetic transmission is well known. ABO system of human blood is one such character and would serve as one of the useful criteria for this purpose." Illustrations from various racial groups in India are given. [B.A. 22(1):142]

Recent developments in Swedish population policy. Part I. Population Studies 2(1):3-70. June, 1948.

An account of recent developments in Swedish population policy, with particular reference to the work and consequences of the second Swedish Royal Commission, appointed in 1941. "After discussing the main characteristics of present Swedish policy and the considerations by which it has been influenced, the author surveys the various measures introduced, or under discussion, to meet special needs, including marriage loans and loans to individuals with university or similar training, ...measures designed to reduce the pressures which lead women to seek abortions, and the comprehensive scheme of maternity benefits likely soon to come into operation. In addition, the author analyses the system of grants in aid of specific items in current family expenses, including, in particular, rent rebates. The details of all the relevant measures are given, and the author traces the various stages of their evolution."

2231. International Labour Office.

Family allowance schemes in 1947: I. International Labour Review 57(4):315-333. April, 1948. [To be continued]

A survey of existing schemes of family allowances "which takes account of wartime and postwar changes in the older schemes as well as the introduction of new schemes." The study deals with the prevalence of plans, objectives of family allowances, including the demographic aims, families covered, and children covered.

2232. Leener, Georges de.

Twenty-five years of family allowances in Belgium. (Vingt-cinq années de régime des allocations familiales en Belgique.) Brussels, Office de Publicité, S. C., 1947. 188 pp.

A description of the growth of family allowances in Belgium and an account of the principal legislative acts with respect to them. "A number of provisions of the present scheme are described and commented on briefly....References are made in the study to demographic and other objectives of family allowances." [I.L.R. 57(3):379]

2233. Political and Economic Planning (PEP).

Population policy in Great Britain. London, 1948. 227 pp.

A survey of population trends in Great Britain as a basis for a population policy that will be concerned with quality as

well as with numbers. [Eugenics Review 40(2):55]

2234. Portugal. Laws, Statutes, etc.
Family allowances for workers....(Abôno de familia para os trabalhadores por conta doutrem. Contem a mais recente legislação.) Edited by João Raposo. Aveiro, Tip. Minerva Central, 1947. 167 pp.

2235. Reynolds, Rex.
Searchlight on South Africa's native policy. Pretoria, State Information Office, 1947[?]. 64 pp.
"Describes measures undertaken by the Government for the economic and social betterment of both rural and urban native population. The activities include land reclamation, agricultural improvement, health protection, housing, and education." [M.L.R. 66(4):426]

2236. Sukselainen, V. J.
Family considerations in income and property taxation. (Perhesuhteet tulo-ja omaisuusverotuksessa.) Population Policy Research Institute, Publications, Series A:1. (Väestöpoliittisen Tutkimuslaitoksen Julkaisuja, Sarja A:1.) Helsinki, 1946. 222 pp. [Summary in English]
A study of the principles of tax legislation with particular reference to the experience of Finland. The discussion emphasizes the problem of applying a progressive scale of taxation and the advantages of using the individual rather than the family group as the basis of assessment in a progressive scale of taxation. Finally, the use of taxation as a means of active population policy is considered.

2237. Sweden. Socialstyrelsen.
The housing conditions of families with children. (Vissa barnfamiljers bostadsförhållanden.) Sociala Meddelanden 58 (5):346-355. May, 1948. [Summary in English and French]
Report of an inquiry "in 30-odd municipalities with a combined population of about 85,000 in order to elucidate certain questions in connection with the planned housing allowances to families with at least 2 small children."

2238. United Kingdom. Home Department.
British nationality bill, 1948; summary of main provisions. Parliament. Command Papers, No. 7326. London, H. M. Stationery Office, 1948. 10 pp.

2239. U. S. Public Health Service.
New public health laws. Public Health Reports 63(33):1059-1072. Aug. 13, 1948.
A summary of several laws enacted during the Second Session of the Eightieth Congress which have a bearing "not only on the future activities and functions of the Public Health Service, but also on the general health and well-being of the entire American people." The laws reviewed include Public Law 655, establishing within the Public Health Service a National Heart Institute, and Public Law 643, "authorizing participation by the United States in the World Health Organization."

X: ADMINISTRATION AND METHOD

Administration

2240. Assocation of Scientific Workers. Social Science Committee.
The social sciences. A case for their greater use. London, Porteous Ltd. 46 pp.
Survey of the social sciences in England and Wales, the need for their services, and their ability to fulfill that need. The report suggests specific ways in which each branch of the social sciences can be of service to governmental and other agencies, and discusses the training facilities available and the shortage of manpower in each field. Demography is included as one of the important sciences necessary for governmental operation and planning. Specific recommendations are given for furthering the work and usefulness of the social sciences.

Method

2256. Bailey, W. G., and Haycocks, H. W.

A synthesis of methods of deriving measures of decrement from observed data. Journal of the Institute of Actuaries 73 (Part 2, No. 337):179-199. Discussion, pp. 200-212. 1947.

Various formulas are given, involving "time," "age," and "duration," and the technique suggested is applied to the construction of a life table for illustrative purposes.

2257. Columbia University. Statistical Research Group.

Selected techniques of statistical analysis. New York, McGraw-Hill Book Co., Inc., 1947. 473 pp.

"Discusses a series of problems that occur often in planning, analyzing, or interpreting quantitative data." [Social Security Bulletin 11(4):41]

2258. Duncan, Otis Dudley.

Regional comparisons standardized for urbanization. Social Forces 26(4):430-433. May, 1948.

Presents a method for standardizing summary figures for regional comparisons so that such comparisons relate to "sectors of the regions' populations which are at comparable levels of urbanization....By way of illustration, standardized ratios of physicians in active practice per 10,000 population in 1930 are worked out for the nine geographic divisions, using a breakdown of five size groups of cities." Limitations of the standardized ratios are pointed out.

2259. Germany. Soviet Zone. Statistisches Zentralamt.

The measurement of mortality. (Über die Messung der Sterblichkeit.) Statistische Praxis 2(5):74; 2(6):89-90. May and June, 1947.

2260. Stephan, Frederick F.

History of the uses of modern sampling procedures. Journal of the American Statistical Association 43(241):12-37. March, 1948.

"This paper was prepared in connection with studies of sampling under the Committee on the Measurement of Opinion, Attitudes and Consumer Interests of the National Research Council and the Social Science Research Council." A description of early uses of sampling and a discussion of the need for developing efficient sampling methods are followed by considerations of the simpler random and systematic sampling techniques, the experimental comparison of methods and development of complex sampling procedures, and the development of the use of judgment selection and controls in sampling. The paper concludes with a general summary of the status of sampling today.

How to read aerial photographs for census work. Prepared by Norman Carls. Washington, 1947. 44 pp.

2266. Vlček, Ivan.

The extrapolation of growth curves. (Extrapolace růstových křivek.) Statistický Obzor 28(1):33-44. March, 1948.

A discussion of the logistic law and its application precedes presentation of a graphical method of extrapolating population growth curves, "the point of which is extrapolation of the curve expressing the dependence of speed of growth on the attained volume of the growing object." [Summary in French and English]

2267. Woytinsky, W. S.

Principles of cost estimates in unemployment insurance. U. S. Social Security Administration, Bureau of Employment Security. Washington, Govt. Printing Office, 1948. 174 pp.

"This report is essentially a technical document that discusses the effect of labor-market, statutory, and administrative factors on the operation of unemployment insurance and attempts to measure the costs of various programs over a hypothetical business cycle." Part I deals with the "Volume of unemployment in compensable-duration intervals," and Part II with the "Operation and cost of unemployment insurance programs." Appendixes present the methodology of measuring the hypothetical volume of unemployment under specific conditions.

2268. Zarur, Jorge.

Geography and cartography for census purposes in Latin America. Estadística 6(18):3-24. March, 1948. [To be continued]

"This report deals mainly with the basic geographic and cartographic work already existing in the Latin American nations which could serve for the compilation of census maps, and with the available human and material resources which should be utilized for the compilation of the cartographic background material for the 1950 Census of the Americas." Reports are made for specific countries; in the present section a survey is given of cartographic material in Mexico, countries of continental Central America, countries of Caribbean Central America, Venezuela, and Colombia.

NOTES TO TABLES 1 AND 2

Table 1. Additional Data on Population Growth

* Provisional.
† Approximate.

F/ De facto population; J/ de jure population.

a/ Presents only data received more recently than those given in Population Index 14(3).

b/ Includes only those countries in which the last census was taken in 1900 or later, and in which there are at least 500,000 inhabitants.

c/ Computed on the assumption of constant rate of growth during the period.

d/ Including armed forces overseas. "In the 1940 census the armed forces...serving overseas were excluded from the figure for the total population....It is estimated that this group numbered about 151,000. The estimates...including armed forces overseas ...were computed by adding births and immigrants and subtracting deaths and emigrants from the population enumerated on April 1, 1940. As a result the estimates also exclude 151,000 persons and are comparable with the figure from the 1940 census."

e/ Total population, i.e., the civilian population plus armed forces stationed in the area. Figures given for the civilian population are as follows: Puerto Rico, census of 1940 - 1,866,000; estimate for July 1, 1947 - 2,141,000. Hawaii, census of 1940 - 397,000; estimate for July 1, 1947 - 509,000.

f/ Including estimates for the inhabitants of jungle areas (estimated at 350,000 at the time of the 1940 census), and for census underenumeration (estimated at 465,144 in 1940).

g/ Excluding tribal Indians, estimated at 100,600 in 1941.

h/ Including Dodecanese (Aegean Islands).

i/ Present territory.

j/ Including adjacent islands.

k/ Rate applies to last intercensal period.

1/ Unless otherwise noted, figures were taken from: United Nations. Statistical Office. Monthly Bulletin of Statistics 2(8): 4-7. Aug., 1948; or, in the case of early census figures, from: League of Nations. Statistical Year-Book, 1942/44, Table 2.

2/ U. S. Bureau of the Census. "Estimates of the population of continental United States: 1940 to 1948." Current Population Reports. Population estimates. Series P-25, No. 13, p. 3. Aug. 13, 1948.

3/ U. S. Bureau of the Census. "Estimates of the population of Hawaii, Puerto Rico, the Panama Canal Zone, and the Virgin Islands: 1940 to 1947." Current Population Reports. Population estimates. Series P-25, No. 11, p. 2. Aug. 6, 1948.

5/ Brazil. Instituto Brasileiro de Geografia e Estatística. Recenseamento Geral do Brasil 1º de setembro de 1940. Sinopse do censo demográfico: Dados gerais. Rio de Janeiro, Serviço Gráfico do Instituto Brasileiro de Geografia e Estatística, 1946. P. 1.

6/ Peru. Dirección Nacional de Estadística. Boletín de Estadística Peruana 8(4): 11. Oct.-Dec., 1947.

7/ Netherlands. Centraal Bureau voor de Statistiek. Maandschrift 43(3-4):268. March-April, 1948.

8/ Spain. Instituto Nacional de Estadística. Boletín de Estadística 10(42):3. June, 1948.

9/ United Kingdom. Central Statistical Office. Monthly Digest of Statistics, No. 31, p. 1. July, 1948.

10/ Union of South Africa. Office of Census and Statistics. "Population census, 7th May. 1946." Monthly Bulletin of Statistics 26(7):28. July, 1947.

11/ Australia. Commonwealth Bureau of Census and Statistics. Quarterly Summary of Australian Statistics, Bulletin No. 191, p. 3. March, 1948.

Table 2. Additional Vital Rates

† Approximate.

a/ Presents only data received more recently than those given in Population Index 14(3).

b/ Birth rate based on total population, including armed forces overseas; deaths exclude deaths among armed forces overseas and death rate is based on population excluding armed forces overseas.

c/ Excluding Yukon and the Northwest Territories.

d/ Excluding jungle population.

e/ Including Southern Dobrudja.

f/ Present territory.

1/ Unless otherwise noted, figures were taken from: United Nations. Statistical Office. Monthly Bulletin of Statistics 2(8):8-16. Aug., 1948.

2/ U. S. National Office of Vital Statistics. "United States: Summary of vital statistics, 1946." Vital Statistics-Special Reports 28(1):11, 18, 35. Sept. 13, 1948.
